EXPERIENCE

Full Stack Developer

Cult Of Coders

📅 Aug 2022 - Ongoing

📍 Iasi, Romania

- Expanded functionality of The Super Club website and admin dashboard by developing new features for streamlined event management.
- Leveraged technical expertise to enhance the project management capabilities of Agency Box website with the development of new features for small businesses.
- Techs: React, Next.js, GraphQL, Apollo client, Antd.

Full Stack Developer

Callvita Company

📅 Sep 2021 - Aug 2022

📍 Cairo, Egypt

- Developed new features and maintained Srvy app.
- Implemented real-time call booking through AppSync and GraphQL integration.
- Techs: React, React Native, GraphQL, NodeJS, Express, PostgreSQL.

Full Stack Developer

Pleny (Formerly Qurba)

📅 June 2020 - Sept 2021

📍 Alexandria, Egypt

- Developed Qurba's main website from scratch.
- Oversaw the restaurant manager's website, handling all aspects of its functionality.
- Implemented Google Analytics and Elastic Search.
- Implemented Logalytics using LogDNA for comprehensive front/ back-end logging.
- Managed AWS S3, CodePipeline, CodeBuild, and CloudWatch for efficient deployment and monitoring.

PROJECTS

Qurba User Web

Website for social food ordering where users can see offers and meals and interact with them via like comments, shares, and orders from restaurants.

- Took full ownership of website implementation from scratch.
- Implemented social foodies' news feed with posts, comments, likes, and shares
- Integrated state management with NgRx and Google Maps API for enhanced user experience.
- Implemented Google and Facebook login for seamless authentication.
- Tech stack: Angular, Angular Universal, NgRx, Google Maps API.

Code To Geeks

A medium-like website in which users can follow up with the latest tech articles, and interact with them.

- I was responsible for creating and executing the front-end design of the primary website in its entirety.
- Techs: Nextjs, TypeScript, Redux, Redux Toolkit, SSG, SSR.

Shopping Cart API

A fully-functional E-commerce API supporting PayPal payments and all essential features, including authentication, products, carts, orders, reviews, and user wish list.

- Built and implemented API from scratch with user access rules, pagination, filtering, and sorting for all lists.
- Integrated email messaging service to enable order status tracking.
- Techs: Node.js, Paypal-rest-SDK, Express, Mongoose, Token-based authentication.

EDUCATION

B.Sc. in Electronics and communication engineering

Alexandria University, Egypt

📅 Oct 2014 - Jun 2019

(EU Blue Card-Eligible University)
